The Amino world of Digital Signage

Video Delivery to Screens Anywhere

Video is communication. Video is storytelling. Video is everywhere.

Enabling reliable video delivery, to screens in all kinds of environments, is at the core of our Digital Signage solutions.

Whether it is the screens distributed throughout sports stadiums and hospitals or in hotels, corporate offices or retail environments, businesses are using video to inform, entertain and educate.

Digital signage solutions must address the demands of specific deployment scenarios.

However, the media player must:

- Support various media formats from high quality audio video to static images
- Provide options for out–of–sight operation and power-over-ethernet
- Support landscape and portrait video displays
- Be easy to deploy and manage
- Easily integrate with complementary platforms

For over two decades, Amino media players have been deployed in a wide range of environments with a variety of video platforms, content management software and video displays.

For decades, Amino media players have been deployed in a wide range of environments.

Government and Military

Amino devices have been in the "room where it happens" enabling real-time viewing of aerial reconnaissance and security operations

Residential

Our media players are behind the screens, delivering entertainment content to residents of hospitals, universities and prisons in both common and private areas

Betting

Amino media players and software enable and ensure low latency, live sport video delivery to TVs in betting shop

Corporate Video

Amino facilitates in-house video delivery and consumption for screens in common areas, lobbies and meeting rooms

Hospitality

Amino devices with PoE simplify installation in hotels rooms around the globe

Stadiums

Our media players make sure fans don't miss a second of the event with high quality video and graphics distributed to screens throughout the stadium

Point-of-Sale and information Services

Amino media players power video and advertisement services at PoS counters and kiosks; and provide real-time information within transportation hubs

Community Portals

Amino solutions connect communities to the content they need, whether on oil rigs, at the south pole, in the doctor's office or on a cruise ship or aircraft

End–To-End Value

Amino's Digital Signage solutions fulfill expectations for reliable technology with incremental value simplifying deployment, set-up, use, customization and ongoing management.

1. Install
- Self-install wizard
- Reduce deployment time

2. Deliver
- Static images, 4K audio/video, live channels
- Portrait & landscape display
- Playlists & scheduled content

3. Customize
- SDK supporting native & browser based applications
- Customizable UX
- Easily integrate with 3rd party applications

4. Manage Content
- Built-in zapper
- Configure live channels
- Create playlists
- Schedule content

5. Manage Devices
- Cloud based control
- View deployed devices
- Remotely identify & diagnose issue
