

Operator Tier Next-Gen IPTV with Amino and Enghouse Networks

In today's fast-paced world, IPTV is not just about watching TV; it's about delivering an immersive, seamless user experience that offers ease of management and personalized content. As leaders in the IPTV industry, Amino Communications and Enghouse Networks are proud to introduce an operator-tier, next-gen solution that stands out for its reliability, innovation, and unparalleled user engagement. Our solution harnesses the power of the AndroidTV OS, bringing advanced features and a vast app ecosystem into the mix.

Proven Success

We are proud to announce that we have doubled our customer numbers over the past 18 months, demonstrating the effectiveness and appeal of our solutions.

Integrated Offering

Our integrated offering includes the EspialTV SaaS video platform with compelling UX, seamlessly combined with the advanced Amino Amigo 7 series Set-Top Boxes (STB) and fully manageable with Amino's Engage service management solution. This comprehensive package ensures an easy-to-manage, feature-rich IPTV experience with superior customer satisfaction, enhanced by auto-launch and auto sign-in, with a fully immersive Operator Tier App. The Amino Amigo 7 Series Set-Top Boxes (STB) provide proven performance and unmatched reliability, making them the perfect complement to the EspialTV SaaS video platform.

Key Benefits of Our Collaboration

Seamless Integration

The combination of Amino's advanced hardware and EspialTV's robust software creates a seamless and efficient IPTV solution.

Future-Proof Technology

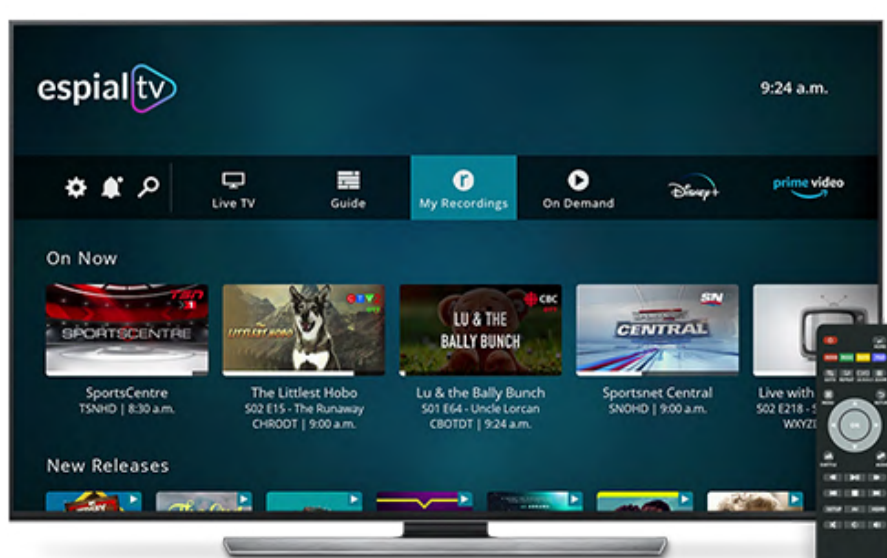

Our joint offering ensures that your IPTV service remains cutting-edge, adaptable to new technologies and evolving market demands.

Enhanced User Experience

By integrating the best of both platforms, we deliver a superior user experience with advanced features and ease of use.

Scalable Solutions

Whether you are a small operator or a large enterprise, our solutions scale to meet your needs, offering flexibility and growth potential.

Amino 7 Series: Operator Tier Certified UHD STB

Full Manageability: Take control of your STBs with ease, ensuring a smooth and tailored user experience.

Self-Install: Empower subscribers with hassle-free self-installation, reducing installation costs and time.

AndroidTV OS Integration: Enjoy the benefits of running on AndroidTV OS, including access to a vast app ecosystem, personalized recommendations, and voice search capabilities

Streamlined Management: Operators can remotely manage and troubleshoot STBs, enhancing operational efficiency.

Auto Launch & Sign-In: Automatically launch into the operator's main screen and sign in, enclosed in the EspialTV UX for a seamless start.
